## Casket Roller Replacement Instructions

### Tools Needed:

- Towel
- 3/8 Wrench

This instruction sheet provides step-by-step guidance on how to replace a roller in our casket roller assembly. Want visual instructions? Check out our instructional video by visiting our YouTube channel or website.

- Step 1:** Remove the frame housing from the floor of your vehicle
- Step 2:** Flip the housing over
- Step 3:** Locate the four bolts that hold the roller into the frame
- Step 4:** Remove the bolts and brackets, set aside
- Step 5:** Remove the roller with the rod, and then the rod from the roller
- Step 6:** Slide rod into new roller and place new end caps on
- Step 7:** Place back into frame, ensuring that it is centered
- Step 8:** Reinstall brackets and the four bolts back into the frame, tighten bolts
- Step 9:** Reinstall the roller back into the floor and done!
